Parts Washer
Questions and Answers #3
September 7, 2022

- Q1. Do you have a TDS-Tech Data Sheet for this chemistry?
- A1. No. After speaking with our chemical rep., the SDS-Safety Data Sheet does list Sodium Nitrite as corrosion protection.
- Q2. If you can't provide a TDS, do you know if an RP-Rust Preventative is included/added?
- A2. Yes, and it is listed on the attached SDS sheet.
- Q3. I can quote a mild steel machine, but if there is no RP, it will rust. Do you want me to proceed with this?
- A3. Yes.
- Q4. I can also quote the fresh rinse to drain, but even if there is an RP, it will wash it off the inside of the cabinet and cause rust. Do you still want me to proceed with this?
- A4. Yes, our old machine is from 1998 and it is mild steel and lasted this long and still isn't rusted out.
