Parts Washer  
Questions and Answers #1  
August 25, 2022

- Q1. What is the voltage/phase/amp draw in the building where you want to install the unit?
- A1. 208/120 and 277/480 volts.
- Q2. What size machine do you want?
- A2. Comparably to what we currently have.
- Q3. Specifically, the basket diameter and interior working height?
- A3. Our current machine has a height of 49.50”, width of 31.00”, and is 33.50” deep with a 28” pull out turntable. Our current machine is heated with a timer and skimmer.
- Q4. Would you like mild grade or stainless-steel machine?
- A4. Price both and Topeka Metro will decide.
- Q5. What is the installation situation? Is this going to be a simple remove the old unit, drop off and wire the new unit or is it more involved? Is there access to the machine for a forklift to reach?
- A5. The installation situation is that this is going to be a simple remove the old unit, drop off and wire the new unit. There is access to the machine for a forklift.
